## PROJECTS

**MadHacks:** Worked on building the frontend and the backend of a Virtual Reality Physiotherapy Game using a combination of Virtual and Augmented Reality.

**Expiry Tracker App:** Made an Android application to keep track of the expiry date of products used in daily life. It sends out a notification when the registered product is about to expire (In progress).

**Face Recognition App:** Takes two similar faces and determines whether they are of the same person and shows the level of similarity accordingly using Microsoft's face recognition API (In progress).

**Multi-purpose Calculator App:** Made a calculator application which solves linear and quadratic equations along with performing the basic functions of a scientific calculator. It also implements Auto Complete Text to autocomplete the name of the Chemical Element the user enters and displays the properties of that element.
